Climate change is one of the most pressing issues facing our planet today. It's a complex and multifaceted phenomenon that demands a comprehensive understanding from all sectors of society, including the education sector. This guide has been meticulously crafted to equip educators with the knowledge and resources they need to effectively teach about climate change and empower their students to become agents of change.

Chapter 1: Characteristics of Climate Change

This chapter delves into the defining characteristics of climate change, providing a foundational understanding of its key features and patterns. It examines long-term changes in temperature, precipitation, and extreme weather events, highlighting the distinction between weather and climate.

Chapter 2: Causes of Climate Change

Chapter 2 explores the primary causes of climate change, focusing on both natural and human-induced factors. It examines the role of greenhouse gases, the enhanced greenhouse effect, and the impact of human activities such as fossil fuel combustion on atmospheric composition.
