

# The Great Wall of China: Arbitrary Borders

The Great Wall of China is one of the most iconic and recognizable structures in the world. It is a symbol of China's long and rich history, and it has been a source of fascination for centuries. But what many people don't know is that the Great Wall is not actually a single, continuous structure. It is a series of walls and fortifications that were built over a period of centuries, and it spans thousands of miles.

The Great Wall was first built during the Qin dynasty (221-206 BC) in Free Download to protect the Chinese empire from nomadic tribes from the north. The wall was extended and strengthened over the centuries, and by the Ming dynasty (1368-1644), it had reached its greatest extent. The Ming Wall is the most famous section of the Great Wall, and it is the one that most people think of when they think of the Great Wall. It is made of stone and brick, and it is over 13,000 miles long.
